## Technical Skills

**Likes:** c# asp.net-core angular flutter mongodb firebase sql  
**Dislikes:** php laravel oracle

---

## Experience

*Jun 2021 → Current* **FullStack Developer** – [AgileThought, LLC](#)  
asp.net-mvc, entity-framework, c#, html, css, azure, sql, git, visual-studio

Build and complete user stories related to new functionality. Bugs fixing. Database improvements

---

*Mar 2021 → Jun 2021* **.Net Core Developer** – [MassGlobal](#)  
asp.net-core, sql-server, mongodb, microsoft-teams, tfs, azure-devops, scrum, angular, entity-framework

I was responsible to build and develop new functionality. Also maintain some of the older functionality. Some days had to write some stored procedure or queries for SQL

---

*Aug 2019 → Apr 2021* **.Net/ Angular developer** – [Taller Technologies](#)  
azure, sql-server, c#, angular, entity-framework, mongodb, azure-functions

I am responsible to build a website where we use Angular at the frontend and .Net core for the backend. Also I use a Sql database to store all the data and EF to map the entities from the DB.

---

*Mar 2018 → Sep 2019* **Tech Lead .Net & Angular** – [Qubits](#)  
.net, .net-core, angular, jquery, html, css, jira, mongodb, postgresql

Manage continuous integration and continuous delivery of the .Net applications and services of the customer. Responsible of the deploys to production and reviews of new implementations. Dedicated to code reviews and merge to the master repository. Guiding and full collaboration with each member of the team applying agile methodologies. Complete setting of environment in Azure with webapps, resource groups, cosmosdb

---

*Aug 2017 → Mar 2018* **Fullstack developer** – [IoTecnologias](#)  
xamarin, asp.net, asp.net-mvc, angularjs, mysql, entity-framework, xaml

Develop mobile and web application using Xamarin, sqlite, MySQL, MVC.NET, Angularjs. Also administer our mysql database.

---

*Mar 2016 → May 2017* **AngularJS/.Net Developer** – [Teleprom](#)  
.net, mysql, angularjs, asp.net-mvc-4, twitter-bootstrap, jquery

Develop real time application using SignalR with MVC4.Net and AngularJS with Bootstrap at the front end. For some cases used jQuery just to control the DOM. Administrate MySQL database.

---

*Feb 2015 → Mar 2016* **Front end developer** – [VMN+](#)  
angularjs, twitter-bootstrap, asp.net-mvc, sql-server, git

Develop websites with AngularJS and Bootstrap. Use MVC.NET, C# and EntityFramework. IDE: Visual Studio 2013

---

*Feb 2014 → Feb 2015* **Front end developer** – [BVision](#)  
visual-studio-2012, asp.net-mvc-4, c#, tfs

Worked in CitiBank with corporate .Net solutions, use Visual Studio and TFS to control our apps.

---

*Feb 2013 → Feb 2014* **ASP.NET Developer** – [QServices](#)  
asp.net, sql-server, nhibernate, entity-framework, html

Develop human resources modules for DirecTV customer and also manage sql database to hold all the information. To handle data more easy we use Hibernate with xml configuration. And for the presentation we used html.

---

*Feb 2012 → Feb 2013* **.NET/jQuery Developer** – [Atos](#)  
asp.net-mvc-3, jquery, jquery-ui, sql-server, entity-framework, .net, c#, razor

Help to develop website intranet for YPF, use MVC 3 architecture and add jquery to control the DOM. We also handle data with Entity Framework and store the information in SQL

---

## Education

Jun 2018 → Feb 2021 **System Analyst** – Institucion Cervantes  
c#, scrum, bitbucket, git, sql-server, visual-studio-2017, entity-framework-4, winforms

---

## Certifications

Jul 2018 → Jul 2018 **Web Development: HTML and CSS** – <https://learndigital.withgoogle.com/activate/course/web-development-l>  
html, css

---

## Apps & Software

May 2020 **EnSierrasChicas** – <http://ensierraschicas.com/>  
flutter, firebase, mapbox, angular

Mobile app build to help people from Cordoba. We offer all the user need to know about any local commerce near you. As admin side we used Angular to build nice interface.

---

Mar 2019 **A la mano** – <http://www.alamanocongelados.com/>  
xamarin.forms, visual-studio-2017, mongodb, mongoose, c#, node.js, angular

Application related with delivery of food around Cordoba. We used Xamarin and MongoDB.

---

Feb 2019 **Clinker** – <http://www.clinkerconstruccion.com/>  
html, css, jquery, mongodb, node.js

Responsive website, landing page for construction client.

---

May 2017 **NoNeedPlan website** – <https://noneedplan.com.ar/>  
jquery, html5, twitter-bootstrap, javascript

Informative web site build with HTML, JQuery and CSS.

---

## Tools

**Favorite Editor:** Visual Studio, Visual Studio Code, Notepad++
