Serverless Computing

Marcos Casor

Flutter | C# .Net | Node | Angular Developer
Argentina

Summary

Software developer with full-stack profile orientated to .Net technologies for the back-end, Angular on the front-end and finally Flutter when build mobile applications. I have experience working with different type of projects from scratch and giving support to already created software. Technical capacities and good skills to work with big and small teams always following best practices. Knowledge with deployments, managing continuous integration and continuous deployments. Always trying to improve as a person and as a software developer.
