Marcos Casor

Senior .NET Backend Engineer · C# · Azure · Full Stack (Angular, React)

LinkedIn · Portfolio

SUMMARY

I've been working with .NET since 2011: consultancies, a bank, two oil companies and two products of my own.

Right now I'm at Chevron, writing C#/.NET backend services, Azure Functions for background processing, and the Azure DevOps pipelines that ship them. I also look after the team's Angular apps.

What I like most is taking a system nobody wants to touch and leaving it in a state where the team can work without fear. I moved .NET Framework 4.0 to 4.8 with all the Entity Framework dependencies riding along, and took Xamarin code to MAUI. I also upgraded Angular 12 to 14 on a product of my own. None of that is glamorous. It's the work that keeps a product alive.

I taught for two years at Cervantes: mobile development with Flutter and web programming with .NET Core and React. You have people in front of you asking why, and that forces you to actually understand what you're doing.

I built QuieroCuentos and EnSierrasChicas end to end. That's where I learned deadlines and budgets aren't abstract.

These days I'm putting hours into LLM applications: RAG, agent orchestration, Python. Still learning, and I'd rather say so.

CORE SKILLS

- **Backend:** C#, .NET (Framework → 7), ASP.NET MVC/Core, Web APIs, Entity Framework, Node.js, NestJS
- **Frontend:** Angular (12 → current), React, AngularJS, TypeScript, JavaScript
- **Mobile:** Flutter (BLoC), Firebase, Xamarin → MAUI migration
- **Cloud & DevOps:** Azure (Functions, Web Apps, Resource Groups, Cosmos DB), Azure DevOps, GitHub Actions, TeamCity, Octopus, CI/CD design
- **Data:** SQL Server, PostgreSQL, MySQL, Oracle, Firestore, Redis
- **Practices:** Scrum, code review, branching strategy, technical mentoring
- **Currently exploring:** Python, LLM application patterns (RAG, agent orchestration)

EXPERIENCE

Chevron — .NET Developer (C# · Azure · Angular)

Jan 2025 – Present · Córdoba, Argentina (remote)

- Build backend services and business logic in C#/.NET, plus Azure Functions for event-driven and background processing.
- Maintain the team's Angular applications, focused on performance and responsive UI.
- Run the Azure DevOps pipelines end to end, and own the pull-request and branching rules the team follows.

Grape Software — .NET Developer (C# · Angular · Flutter)

Sep 2023 – Feb 2025 · Córdoba, Argentina (remote)

- Develop and maintain the core system in C#/.NET 7, with Angular on the front end and Flutter for the mobile client.
- Built the GitHub Actions pipelines, shipping a new app version every Friday.
- Coordinated a three-person dev team as its most senior developer, reviewing their pull requests and setting the code quality bar for the core system.
- Worked directly with the business side to define requirements.

QuieroCuentos — Flutter & Angular Developer (own product)

Jan 2022 – Jan 2024 · Argentina

- Built and shipped the product's app in Flutter for iOS, Android and Web using BLoC and Firebase.
- Set up CI/CD with GitHub Actions.
- Administered the Firestore database.
- Created the admin site and its submodules in Angular.
- Upgraded the Angular codebase from v12 to v14.

Santex — .NET Developer (framework migration)

Mar 2023 – Jul 2023 · Argentina

- Upgraded .NET Framework 4.0 → 4.8 including Entity Framework dependencies.
- Migrated Xamarin code to .NET MAUI.
- Administered MySQL databases and tracked work in TFS.

Santander Argentina — React / Node Developer

Jun 2022 – Dec 2022 · Argentina

- Built a front-end dashboard in React.
- Developed the API layer with NestJS.
- Implemented Redis caching in .NET.
- Administered Oracle databases.

AgileThought — C# Developer

Jul 2021 – Jul 2022 · Argentina

- Maintained a monolithic system built on .NET MVC, C# and SQL.
- Submitted and reviewed pull requests through Git/DevOps.
- Worked in a Scrum-organized team.

EnSierrasChicas — Founder & Mobile Developer

Mar 2020 – Jun 2021 · Córdoba, Argentina

- Founded and built a local mobile venture end to end: Flutter + Firebase app plus an Angular admin site.

Taller Technologies — Full Stack Developer

Sep 2019 – Mar 2021 · Córdoba, Argentina

- Built a .NET Core API with Entity Framework over SQL Server, consumed by an Angular 6 front end.
- Developed Azure Functions for background processing.

Alpha Fintech — .NET Technical Lead / Full Stack Developer

Mar 2018 – Aug 2019 · Córdoba, Argentina

Technical Lead *(Feb – Aug 2019)*

- Ran CI/CD for the customer's .NET applications and services, including production deployments.
- Reviewed new implementations and owned merges to the master repository.
- Set up the full Azure environment: Web Apps, resource groups, Cosmos DB.
- Mentored team members and applied agile practices.

Full Stack Developer *(Mar 2018 – Feb 2019)*

- Delivered features and fixes across ASP.NET MVC, ASP.NET Core, AngularJS, JavaScript and REST APIs.
- Automated continuous integration and deployment with TeamCity + Octopus.
- Worked requirements in JIRA, documentation in Confluence, source control in GitLab.

Earlier roles — .NET Developer

2011 – 2019

Northgate Arinso (SAP interfaces) · Atos (web application support, Total Austral) · Qservices (ASP.NET, jQuery, SQL, NHibernate for DirecTV) · BVision (C# Windows services, SSIS packages, SQL) · VMN+ (MVC5, AngularJS, Web APIs) · Teleprom (AngularJS admin site, SQL, .NET MVC)

TEACHING

Institución Cervantes — Software Development Professor

Feb 2024 – Aug 2025 · Córdoba, Argentina

- Taught Mobile Application Development with Flutter and Web Programming II (.NET Core + ReactJS).
- Covered Firebase, Git and collaborative workflows alongside the core programming curriculum.

Escuelas PROA — Programming Professor (substitute)

Mar 2019 – Aug 2019 · La Calera, Córdoba

- Taught introductory programming to school students using Scratch and Pilas Bloques.

EDUCATION

Analista en Sistemas Informáticos — Institución Cervantes · 2018 – 2020

CERTIFICATIONS

- Microsoft Azure: Architecting Azure Infrastructure
- Angular: Building Large Applications
- Learning Cloud Computing: Serverless Computing
- Claude 101 — Anthropic (completion)

LANGUAGES

Spanish (native) · English (full professional)
